Designed with an emphasis on providing a serene experience, the beautifully detailed interior environment of Continental is crafted to be physically comforting, visually soothing and peacefully quiet. Relax into the Perfect Position front seats trimmed in Bridge of Weir Deepsoft™ leather created exclusively for Lincoln by the historic Scottish tannery. Inspired by private aircrafts, Perfect Position seats feature a patented comfort-carrier design that flexes around you in a personalized embrace. Each thigh cushion extends and adjusts independently to help support both of your legs, the one at rest and the one engaging the pedals as you drive. Heated and ventilated settings help optimize your comfort in any climate, while the Active Motion® massage functionality helps reduce muscle fatigue in your upper legs and lower back. Arrive feeling revitalized and refreshed in Continental.

While the dual-panel moonroof invites all to bask in the sun, the vivid head-up display uses Digital Light Projection technology to help the driver stay informed – even when wearing polarized sunglasses and in bright lighting conditions. Customize the display by adjusting its position and level of brightness, and selecting the details you want to see. Outside, chrome flows seamlessly over the E-Latch door handles, creating a graceful line that quietly contributes to your serenity. Nestle in as your power-cinch doors finish closing themselves, and enjoy every mile of your journey within these spectacular surroundings.

1Available feature. 2Don’t drive while distracted. See owner’s manual for details and system limitations.
You’ll delight in the luxurious comfort and harmonious design Continental offers to all. In addition to the generous leg room featured in both rows, you’ll find an exceptional collection of amenities in the Rear-Seat Package. It lets you care for your travel companions in back by offering them the power to control their environment.

First, they’ll want to customize the fit of their heated and ventilated outboard seats with Active Motion® massage functionality, plus power-adjustable lumbar support and power recline. Next, they can select a temperature and adjust the power rear-window sunshade. Sunshades can also be extended over both rear-door windows.

All of this can be done while enjoying beautiful views framed by the dual-panel moonroof with power sunshade, and increased airflow from the extra rear registers. With this package, the person riding behind the front-passenger seat even has the ability to move it forward when it’s not occupied – creating more room to relax in the back.
Empowering you to move with purpose, Continental is driven by the
smoothly calibrated V6 engine of your choice. Twin-turbocharging
and direct-injection technology help the 3.0-liter and 2.7-liter engines\(^1\) generate virtually instantaneous on-demand power. With the capable
3.7-liter, you get twin independent variable camshaft timing that
precisely controls the operation of intake and exhaust valves to
help optimize fuel combustion. Every engine is paired with an engaging SelectShift® automatic
transmission that puts the control of a manual at your fingertips. Just
tap the steering wheel-mounted paddle shifters to change gears
when you want, or leave it to Continental. Intelligent all-wheel drive
(AWD)\(^1\) is available with any engine to provide you with a dynamic
driving experience – rain or shine.

Imagine yourself gliding effortlessly along – at peace with your
surroundings. Lincoln Drive Control featuring Adaptive Suspension
gets you there by helping to isolate your Continental from road
imperfections. To personalize your ride, explore each of the 3 drive
modes – Comfort, Normal and Sport. With any of them, Electric
Power-Assisted Steering (EPAS) provides steering response and
feedback that helps you feel confident behind the wheel.

When you equip Continental with the 400-horsepower\(^2\) Twin-
Turbocharged 3.0-liter V6 engine\(^1\) and Intelligent all-wheel drive (AWD)\(^1\)
you’ll also benefit from the addition of Dynamic Torque Vectoring.\(^2\)
This technology works in tandem with AWD to enhance performance
by sending up to 100% of the available rear-axle torque to the outside
rear wheel while cornering. The result is smooth and seamless – the
driving experience of your dreams.
